

Statement from Peter M DeVita, MASC, MBA, P.Eng., FEC,
President of e4plnc,
July 29, 2024

The recent Microsoft and Crowd Strike incident illustrates the dangers of a wild west attitude to Software Engineering and AI (now advocated by USA's GOP). Cyber Systems Security and AI are extensions of Software Engineering.

Canada must have a proactive Technology Strategy that guides our Industry and Economy. Technology is the Future. Nations that do not advance in technology have no future.

Engineers build economies. Canada needs its First Ministers to plan Canada's Technology future utilizing our Engineering and Applied Science Professions.
